	BR 33/30 (99785) and BD 33/30 (99780) Large Ride-On Scrubbers						

Eco-Friendly AGM Batteries Versus Wet Acid-Cell Batteries?

Tornado® Auto Scrubbers are available in your choice of traditional flooded (wet) batteries or new, eco-friendly EV Dry Cell, maintenance-free batteries. Wet acid-cell batteries contain sulfuric acid and require your cleaning crew to maintain proper fluid levels to ensure that the batteries perform properly. This periodic maintenance process can be dangerous to both the cleaning worker and to your facility's indoor environment, and if overlooked can both shorten the life cycle and productivity of your traditional battery, as well as create a health risk to your cleaning staff. With Tornado's eco-friendly EV Dry Cell batteries, you can say good-bye to battery maintenance, risk of work-related injury, and hello to increased worker safety, facility health and an increase in cleaning productivity!
