

TORNADO VIRGA

Electrostatic Battery Cart Mister

Tornado Virga

Disinfection - Super Charged

Model #TP380-G08-U

Introducing the Tornado Virga. This Electrostatic Battery Cart Mister is full of features and puts you in total disinfection control. The ability to choose between electrostatic or standard spraying and three spray tip sizes makes the Virga suitable for any surface and space. This unit also provides the unique benefit of allowing you to opt between a budget-friendly dilutable solution or the convenience and consistency of a RTU disinfectant. With features like a lightweight spray nozzle, rolling cart, and the battery power and tank size to provide hours of continuous use without recharging or refilling, the Virga delivers an unmatched combination of portability and productivity.

DISINFECT HOW YOU WANT

Electrostatic or Conventional

- Easily switch between electrostatic or conventional spraying options to match your application needs

Dual Solution Option

- Choose between using RTU gallon bottles or mixing solution in the 8 gallon on-board tank
- Easily go from using the tank to using RTU bottles with just the turn of a dial and the insertion of a tube into the RTU bottle

3 Removable Plastic Spray Tips

- Allows user to choose the best size for their application
 - 40 micron (white): 80 degree spray angle and 30" spray reach
 - 60 micron (blue): 80 degree spray angle and 30" spray reach
 - 75 micron (black): 120 degree spray angle and 21" spray reach

DISINFECT WHERE YOU WANT

Cord-Free Operation

- Removable 44 V 2.9 Ah lithium-ion battery provides approximately 8 hours of continuous runtime on a single charge and recharges in 2 ½ hours

Rolling Cart Design

- Easily maneuvered from room to room, up and down elevators, stairs and from building to building

10' Spray Hose

- Provides enough reach to easily spray large areas without having to move the machine

Lightweight Spray-Nozzle Design

- Reduces the hand and arm fatigue found with most other electrostatic sprayers

8 Gallon Tank

- Provides up to 5 ½ hours of continuous use before having to be refilled

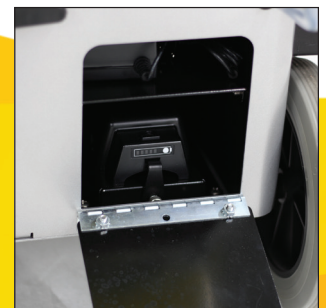

QUICK-DISCONNECTS ON THE MACHINE AND SPRAY GUN

Allows the hose to be removed effortlessly for cleaning and storage

EASY TO FILL AND EMPTY SOLUTION TANK

- Solution fill hose easily attaches to a sink to fill the tank
- Detachable rear dump hose allows for remaining solution to be drained from the tank with ease

FINGERTIP ELECTROSTATIC ON/OFF FEATURE

- **Electrostatic** - Provides an electrical charge to the solution and allows the solution to wrap around all sides of any conductive surface
- **Standard** - Best for spraying smooth surfaces, wall corners and other surfaces that do not have conductive properties

REMOVABLE 44V 2.9 AH LITHIUM-ION BATTERY AND CHARGER WITH EASY ACCESS DOOR

- Battery can be charged on-board or removed for charging
- 50.4 V DC 1.5A charger with AC cable is included with the unit

PRODUCT SPECIFICATIONS	
Model	
Catalog Number	TP380-G08-U
MACHINE DIMENSIONS	
Dimensions (LxWxH)	41" x 19.75" x 38.25" (with wand in holster)
Net Weight (Empty)	66 lbs
Tank Capacity	8 gallons / 30.28 liters
DESIGN CHARACTERISTICS	
Pressure (Max.)	115 psi
Voltage	44V
Flow	40 microns: .02gpm; 60 microns: .04gpm; 75 microns: .04gpm
Battery Run Time	Approximately 8+ hours*
Hose Length	10 feet / 3.048 meters
Battery Recharge	2 ½ hours
Battery Storage	32° - 140° F / 0° - 60° C
In Tank Filter	Yes
# Spray Tips	3
Spray Tip Droplet Size	White = 40 microns, Blue = 60 microns, Black = 75 microns
Spray Tip Reach	White and Blue = 30 inches; Black = 21 inches

*Variance dependent on user application method
